

Pixelart Samurai Sideview Tileset - #2 - Mountain Forest

This pack contains **127 environment sprites** that can be perfectly used for 2D sideview Metroidvania, Adventure, Endlessrunner and many more game genres. It comes with **2 Ground Tilesets** and contains a **beautiful animated Samurai character** with **46 character sprites**. This pack offers an authentic mountain forest environment and is part of a larger **Samurai Pixelart series**, featuring several environment and character packs. The pack comes with a sky background and 4 environment background layers. By using the **5 different background layers** it is possible to achieve **brilliant parallax**. The pack comes with **2 swordhit particle effects** and **all character animations as well as the animation controller are already set up**. The **ground tileset dimensions are 16x16 pixels** and the **characters dimensions are 32x32**, but for reasons of animation effects their animations come as 104x77. The background objects are **shadowed** for extra details and realism. The **ruletiles for the groundtiles are already set up**.

Color Legend:

- **purple = important information**
- **blue = unity directory or file path**
- **blue and underlined = link for website**
- **green = Scene path**
